BURGER PATTY

A Sustainable & High-Protein Alternative

The Divaks Insect Burger Patty is a game-changer in the plant-based and alternative protein market. Crafted from high-quality **textured insect protein** (*Tenebrio molitor*) and plant-based ingredients, this patty is **packed with protein, rich in essential nutrients, and delivers a savory, umami taste.**

APPEARANCE

Rich, earthy color with a slightly textured surface, resembling traditional meat patties. It maintains a uniform thickness, ensuring even cooking.

SMELL AND FLAVOR

A robust flavor profile, with a savory and slightly nutty taste. The seasoning blends harmoniously with the natural flavors, making it versatile for various cuisines.

TASTE

Upon cooking, the patty releases an umami-rich aroma with subtle hints of spices. This scent enhances the overall eating experience and stimulates appetite.

PURPOSE AND USE

The product is perfect for grilling, frying and baking. Ideal for conscious consumers, restaurants, and food processing plants.

KEY BENEFITS:

High in Protein
14.2g per 100g
